Arpan Roy Chowdhury

Forward Deployed Engineer

+91 9804933234 | arcxx1995@gmail.com | arpanroychowdhury.me | github.com/arcxx1995 | Bengaluru, India

Forward deployed engineer with 6+ years of software experience. Built LLM and RAG pipelines for a clinical documentation platform, and real-time data pipelines with REST APIs and webhooks for computer-vision customers. Has built with the Claude Agent SDK, MCP, Slack Bolt, and OAuth, and has integrated Gmail, Google Drive, Notion, Linear, ClickUp, and a CRM through their APIs. Works in TypeScript and Python. Explains technical problems to customers and hands engineers a clean repro. Has independently built several products, including a WhatsApp-connected app with 100+ users.

Experience

Mentalyc Inc Remote
Forward Deployed Engineer *2026*
- Built transcription and processing pipelines and LLM-driven structured note generation (SOAP, DAP, BIRP) on Python backend services and serverless functions.
- Built RAG pipelines over pgvector with LlamaIndex and LangChain, and used LangSmith to trace and evaluate agent behavior in production.
- Ran technical discovery with customers, built REST integrations with their external systems, and tested with pytest in a HIPAA-conscious environment.

Viact.ai Remote
Software Engineer *Dec 2024 – Mar 2026*
- Built Python pipelines that ingest real-time streams from edge devices and computer-vision models, with PostGIS for geospatial data.
- Exposed the data through REST APIs (Flask, FastAPI) and webhooks for customer integrations, and built proofs of concept and demos for prospective customers.
- Provisioned AWS infrastructure (EC2, RDS, CloudFront) with Terraform, deployed services in Docker, and diagnosed production issues across code, pipelines, and infrastructure.

Hilti Asia Pacific Remote
SDE II *Jul 2022 – Dec 2024*
- Built backend services and APIs that manage customer entitlements, subscriptions, and commercial state, with a focus on API design and data modeling.
- Contributed to systems that automate order intake, validation, and fulfillment across channels. Joined design reviews and the on-call rotation for critical issues.

ET Media Labs India
Executive Systems Engineer *Mar 2020 – Jul 2022*
- Built backend systems and automation for multi-channel data acquisition, integrating platform APIs.
- Built reporting and analytics tooling that integrated Google Analytics, Looker Studio, and platform APIs.

Projects

ninjatest.app | *Next.js, Supabase, Vercel AI SDK, OpenRouter* Under development
- Built an agentic coaching chat with multi-step tool calling, and engineered for LLM failure modes with empty-response model fallback and per-route token and cost limits.

Shindigs (shindigs.cc) | *Next.js, Supabase, OpenRouter*
- Solo-built an event-ticketing platform, including an LLM discovery agent with prompt-injection defenses that limit the model to a bounded index of catalogue rows.

glassbottles.app | *Next.js, Supabase, WhatsApp Cloud API* Open source
- Built an anonymous daily messaging app with voice snippets and WhatsApp notifications through the Meta Cloud API. Launched within a month and reached 100+ users and 10+ daily active users. Source is public on GitHub.

vampiric.dev In development
- Building an agentic CLI for application performance optimization.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL
Agents & AI: Claude Agent SDK, MCP, Vercel AI SDK, LangChain, LangGraph, LlamaIndex, RAG, Prompt Engineering
Integrations: REST APIs, Webhooks, OAuth, Slack Bolt, Gmail, Google Drive, Notion, Linear, ClickUp, CRM APIs, WhatsApp Cloud API
Backend & Infra: Node.js, Express.js, Next.js, PostgreSQL, Supabase, Docker, AWS, Linux, CI/CD
Customer-Facing: Technical Discovery, Demos, Troubleshooting, Writing Repros, Technical Documentation

Education

IIT Kharagpur
Executive Post Graduate Certificate in Generative AI & Agentic AI *2025*
Maulana Abul Kalam Azad University of Technology
Bachelor of Computer Application (BCA) *Jul 2016 – Aug 2019*
